THIS IS UNEVALUATED INFORMATION

50X1-HUM

1. Two of the most important power plants in North Korea are on the Pujon and Changjin rivers north of Hamhung. There are power stations on the rivers south of their reservoirs. Water is piped from the reservoirs under the mountains to eight stations, of which there are four on each river.

2.

these power plants were to be moved underground with money supplied by the USSR and China.
